

O.M.R. Rhine freight rate assessment guide

February 2020

O.M.R. assesses Rhine freight rates for the cost of shipping on barges from Amsterdam/Rotterdam/Antwerp. Freight assessments are published daily. Assessments are based on fixtures and market discussions for the relevant cargo, volume, route and timings. Freight assessments are published in €/t, unless specified.

O.M.R. surveys a range of market participants. Assessments are based on transactions, bids, offers and other market information.

Barge freight rates are assessed for gasoil and for mogas (E5 gasoline). Gasoil freight rates to Floersheim and Aschaffenburg are assessed as a differential to gasoil freight to Frankfurt

All mogas freight rates are assessed as differentials to the relevant gasoil freight rate.

Currency/unit: €/t unless specified

Timing: barges loading 2-7 days forward from the day of assessment

Location: routes from Amsterdam/Rotterdam/Antwerp to the specified Rhine destination

Size: cargo sizes ranging from 1,200-2,000t

Assessment time: 12-15:00pm German time

Freight specifications
